Hi Fern – a couple more on this:

Can we switch this to a continuing appropriation?

Also, DPI does not think they need to be able to set fees (at least not in this biennium). However, they did indicate that it would be helpful if they had some rulemaking authority for implementation. Can we add that as well?

Thanks!

Sara:

I have no attachment to the word "distribute." I chose that word simply to reflect that the software was purchased by DPI for use by individual school districts. I could change it to something like "that may be used statewide by school districts."

Do you want language more similar to s. 115.28 (12)? Specifically, do you need language allowing DPI to promulgate rules related to setting a fee and directing any fees collected to a specific appropriation? Also, if you would like fee language, would DPI also be authorized to charge school districts for the training services related to the ACP software?

Thanks,
Fern

Hi Fern - a question about this draft. On page 2, the word "distributed" is used - maybe this is usually the word that is used, but it just sounded odd to me. This would be DPI-maintained software, and access/use would be provided to school districts around the state, likely for a fee. I think we are assuming the setup would be similar to the student information system. Therefore, I just wondered if "distributed" was quite the right word. Any thoughts would be appreciated - thanks!

Hi Fern – we would like to add a requirement that directs DPI to provide guidance to school districts around the implementation of model academic and career plans. Also, we would like to require school districts to begin using the ACP software or system procured by DPI within 5 years of establishment of the software. This would be similar to the requirement of the student information system rollout. See s. 115.28(12)(b). For now, I would leave out charter and choice schools for ACP (which are being added to the SIS in LRB 0990).

Hi Fern – can we make another addition to this draft? Instead of including 115.29(8) #2, we would amend chapters 115 and 118 (both needed?) to require school districts to develop academic and career plans, as defined by DPI, for all students starting in 6th grade and continuing through high school graduation. The requirement would kick in upon DPI's procurement of the ACP software, and districts would have 5 years to comply. DPI would be required to develop rules establishing a model ACP. The rules would have to address or incorporate state law related to education for employment programs. The E4E piece is under 121.02(1)(m), and then everything else is in PI 26.

Let me know of any questions – thank you!

To Sara:

Is it your intent that the model academic and career plan established under proposed s. 115.28 (59) (b) be related to the information technology described in s. 115.28 (59) (a)? Also, is it your intent that the requirement placed on school boards to provide academic and career plans also apply to governing bodies of independent charter schools?
